

09/22/23—Mrs. Hurst's Bi-Weekly 3rd/4th Class Newsletter

Discovery is the act of detecting something new,
or something “old”, that had been unknown.

This week and last, we...

- *Focused on place value, expanded form, and rounding in math
- *Became geologists that recorded the weight and circumference of geodes. Then we broke them open and made wonderful discoveries of how the crystals were formed.
- *Created Rock Cycle posters demonstrating weathering, compaction, etc...
- *Been working on different types of poetry

Important Upcoming Dates

Dear Families,

Thank you so much for your generous donations of class snack. I believe our class is good for snacks for awhile. I will let you know when we are in need of more.

*Andy Goldsworthy inspired art by
Kellan and Otto*

Lifelong Guidelines:

Week of 9/25: Caring

To feel and show concern for others.

Week of 10/02: Common Sense

To use good judgement.

End of the Quarter Celebration

Will be Friday, 10/12, from 1:30—2:10.

Families are invited to come and share with their child their learning for the 1st quarter.

Friendly Reminder

We are asking for a \$20.00 project fee for the school year. If you have not had an opportunity to submit that yet, it would be appreciated.

Thank you!
